Fold

Cut

Returning Product from within the UK

Enter your reference number in the box provided on the label above, cut and fold the label where shown and tape it to the box. It contains all the information for your courier. We recommend Parcel Force/Post Office/DHL/UPS

Returning Product from outside the UK (Europe and Rest of World)

You will be asked by your courier to complete a Customs Declaration or Commercial Invoice which may be part of an "Airway Bill" which may include some or all of the following:

***Description of Goods:** Faulty Navigation Equipment
Tariff Code: 9014 80000
Recipient: Maritime Services Ltd.
Recipient EORI Code: GB684801807000

***Reason for Import/Export:** "Faulty used equipment being returned to the UK for repair and re export to the country of origin"

***Value:** "**Faulty Equipment Scrap Value £25.00**" UK Pounds Sterling

Items marked * must be included.

You must include the words "Faulty Equipment Scrap Value" when stating the value of the equipment. **DO NOT** enter a different value. The insured value should be the replacement value should it go missing and not the value for customs.

Please ensure that you clearly mark the Airway Bill that you the SENDER are paying the freight cost and all taxes and duty. If this is not completed correctly it will delay the package processing through customs and may result in additional administration fees, duty and taxes being added to your repair costs.
